I am quite interested in the 5th English edition (1792) of Guthrie Geography which you have listed for sale if it has a large folded in foreign coin chart. You mention that coins are described in the item. This comment may come from the title page. Please tell me if there is such a chart, either on large sheet or on a group of pages which are adjacent to the text. I am a numismatist and collect numismatic literature.

I was in Stockholm when the warship VASA was lifted up in a net from the bottom of the Stockholm harbor.

Dear Mr. Newman,

Thank you for your inquiry I am sorry, the chart / pages you are looking for are not present in this copy.

If you are looking for swedish numismatic books, please let me know. I am not a specialist in numismatic litterature but I could always try to find items you are looking for.

So you were here when they lifted the Vasa! That must have been really interesting. As you of course know it has been one of the main tourist attractions of Stockholm ever since then. I guess it sank because the king wanted to many guns on an already poorly constructed ship.

Best regards,
Johan Hammarlund
